Installeren van een Drupal webshop

1)

Om Drupal te kunnen installeren heeft u een MySQL database nodig. Als u deze nog niet heeft, kunt u deze aanmaken via de Plesk interface. Zie hiervoor het artikel: MySQL database aanmaken (link: https://www.online-helpdesk.nl).

2)

U kunt WordPress downloaden van de website van de makers ervan: http://drupal.org/. Dit bestand moet u vervolgens op uw computer uitpakken en met een FTP-programma uploaden naar de map /httpdocs/ (Plesk) of /public_html/ (DirectAdmin).

3)

Ga in uw browser naar uw website om de Drupal installatie te starten. Volg de onderstaande stappen om Drupal succesvol op uw hosting account te installeren.

4)

Volg daarna de onderstaande stappen om Drupal op uw hosting account te installeren. Ga in uw browser naar uw website om de Drupal installatie te starten. Kies hier de taal waarin u Drupal wilt gaan installeren en klik vervolgens op volgende.

5)

Kies wat voor installatie u wilt doen, Standard of Minimal. Doorgaans gebruikt men de Standard installatie, die zal in deze handleiding ook beschreven worden.

Select an installation profile

Choose profile

Choose language Verify requirements Set up database Install profile Configure site Finished Standard

Install with commonly used features pre-configured

Minimal

Start with only a few modules enabled.

2

6)

Kies op deze pagina de taal waarin u Drupal wilt installeren, doorgaans zal dit Engels zijn en kunt u gewoon verder gaan. U kunt de taal later niet meer aanpassen in de instellingen van Drupal.

3

Denit Hosting Solutions Kabelweg 21 1014 BA Amsterdam T +31 (0)20 337 1801 F +31 (0)20 337 1802 www.denit.nl ABN AMRO 56.02.97.351 BIC/ Swift ABNANL2A IBAN NL40ABNA0560297351 BTW NL 8234.94.068.8.01 KvK 34.19.12.83

7)

Op deze pagina moeten de gegevens van de database ingevuld worden. Dit zijn de gegevens die u gebruikt heeft tijdens het aanmaken van de database in Plesk.

Database configurat	tion			
	Database type * MySQL, MariaDB, or equivalent SQLite The type of database your Drupal data will be stored in.			
✓ Choose profile	Database name *			
	jouweigenwebsite_nl_cmstest			
 Choose language 	The name of the database your Drupal data will be stored in. It must exist on your server			
✓ Verify requirements	before Drupal can be installed.			
 Set up database 	Database username *			
Install profile	jouwe_cmstest			
Configure site	Database password			
Finished	••••••			
	ADVANCED OPTIONS			
	Save and continue			

8)

Nu wordt Drupal geïnstalleerd en kunt u de websitegegevens opgeven.

De logingegevens van de beheermodule dienen hier opgegeven te worden

De optie CleanURL's zorgt voor nette adresbalk-regels in de webbrowser, deze instelling wordt opgeslagen in de file: /httpdocs/.htaccess, deze kunt u zelf vullen middels copy/paste naar de file /httpdocs/.htaccess.

Als u wilt dat Drupal dit instelt, kunt u de genoemde file volledige rechten geven via de Plesk File Manager (rechten moeten ingesteld staan op: rwxrwxrwx {777}). Hoe u dat kunt doen kunt u bekijken bij onze Plesk video tutorials. Deze informatie vindt u op: https://www.online-helpdesk.nl/.

Het automatisch updaten kunt u aan laten staan als u dat wilt, als u het uitschakelt dient u zelf op nieuwe versies van Drupal te controleren en deze te implementeren in uw website. Zie hiervoor de website: <u>http://www.drupal.org/</u>
