Magento webshop installeren

1)

Om Magento te kunnen installeren heeft u een MySQL database nodig. Als u deze nog niet heeft, kunt u deze aanmaken via de Plesk interface. Zie hiervoor het artikel: MySQL database aanmaken (link: https://www.online-helpdesk.nl).

2)

U kunt Magento downloaden van de website van de makers ervan: http://www.magentocommerce.com/download. Dit bestand moet u vervolgens op uw computer uitpakken en met een FTP-programma uploaden naar de map /httpdocs/ (Plesk) of /public_html/ (DirectAdmin).

3)

Ga in uw browser naar uw website om de Magento installatie te starten. Volg de onderstaande stappen om Magento succesvol op uw hosting account te installeren.

4)

Volg daarna de onderstaande stappen om Magento op uw hosting account te installeren. Ga in uw browser naar uw website om de Magento installatie te starten.
