

## Denit

Deze handleiding beschrijft de stappen die u dient te nemen om een OsCommerce webshop te installeren.

Versie 1.0

## OsCommerce webshop installeren

---

1)

Om OsCommerce te kunnen installeren heeft u een MySQL database nodig. Als u deze nog niet heeft, kunt u deze aanmaken via de Plesk interface. Zie hiervoor het artikel: MySQL database aanmaken (link: <https://www.online-helpdesk.nl>).

2)

U kunt OsCommerce downloaden van de website van de makers ervan: <http://www.oscommerce.com/Products>. Dit bestand moet u vervolgens op uw computer uitpakken en via een FTP-programma uploaden naar de map /httpdocs/ (Plesk) of /public\_html/ (DirectAdmin).

3)

Ga in uw browser naar uw website om de OsCommerce installatie te starten. Volg de onderstaande stappen om OsCommerce succesvol op uw hosting account te installeren.

4)

Volg daarna de onderstaande stappen om OsCommerce op uw hosting account te installeren. Ga in uw browser naar uw website om de OsCommerce installatie te starten.

### Welcome to osCommerce Online Merchant v2.3.3!

osCommerce Online Merchant helps you sell products worldwide with your own online store. Its Administration Tool manages products, customers, orders, newsletters, specials, and more to successfully build the success of your online business.  
osCommerce has attracted a large community of store owners and developers who support each other and have provided over 6,000 free add-ons that can extend the features and potential of your online store.

Server Capabilities	
<b>PHP Version</b>	5.3.23 ✓
<b>PHP Settings</b>	
register_globals	Off ✓
magic_quotes	Off ✓
file_uploads	On ✓
session.auto_start	Off ✓
session.use_trans_sid	Off ✓
<b>Required PHP Extensions</b>	
MySQL	✓
<b>Optional PHP Extensions</b>	
GD	✓
cURL	✓
OpenSSL	✓

**New Installation**

The webserver environment has been verified to proceed with a successful installation and configuration of your online store.  
Please continue to start the installation procedure.

### New Installation

This web-based installation routine will correctly setup and configure osCommerce Online Merchant to run on this server. Please follow the on-screen instructions that will take you through the database server, web server, and store configuration options. If help is needed at any stage, please consult the documentation or seek help at the community support forums.

- Database Server
- Web Server
- Online Store Settings
- Finished!

**Step 1: Database Server**

The database server stores the content of the online store such as product information, customer information, and the orders that have been made. Please consult your server administrator if your database server parameters are not yet known.

**Database Server**

**Database Server**  
localhost

**Username**  
jouwecomtest

**Password**  
\*\*\*\*\*

**Database Name**  
jouwecomtest\_nl\_comtest

The address of the database server in the form of a hostname or IP address.

The username used to connect to the database server.

The password that is used together with the username to connect to the database server.

The name of the database to hold the data in.

- Database Server
- Web Server
- Online Store Settings
- Finished!

**Step 2: Web Server**

The web server takes care of serving the pages of your online store to your guests and customers. The web server parameters make sure the links to the pages point to the correct location.

**Web Server**

**WWW Address**  
http://www.jouwecomtest.nl/ebcm/oscommerce/

**Webserver Root Directory**  
/var/www/hosts/jouwecomtest.nl/httpdocs/ebcm/oscommerce/

The web address to the online store.

The directory where the online store is installed on the server.

1. Database Server  
2. Web Server  
3. Online Store Settings  
4. Finished!

**Step 3: Online Store Settings**

Here you can define the name of your online store and the contact information for the store owner.  
The administrator username and password are used to log into the protected administration tool section.

**Online Store Settings**

**Store Name**  
osCommerce Webshop  
The name of the online store that is presented to the public.

**Store Owner Name**  
Denit  
The name of the store owner that is presented to the public.

**Store Owner E-Mail Address**  
support@denit.nl  
The e-mail address of the store owner that is presented to the public.

**Administrator Username**  
admin  
The administrator username to use for the administration tool.

**Administrator Password**  
koelje456  
The password to use for the administrator account.

**Administration Directory Name**  
admin  
This is the directory where the administration section will be installed. You should change this for security reasons.

**Time Zone**  
Amsterdam  
The time zone to base the date and time on.

**Post-Installation Notes**

It is recommended to follow the following post-installation steps to secure your osCommerce Online Merchant online store:

- Delete the /var/www/hosts/jouweigenwebiste.nl/httpdocs/ebcms/oscommerce/install directory.
- Rename the Administration Tool directory located at /var/www/hosts/jouweigenwebiste.nl/httpdocs/ebcms/oscommerce/admin.
- Set the permissions on /var/www/hosts/jouweigenwebiste.nl/httpdocs/ebcms/oscommerce/includes/configure.php to 644 (or 444 if this file is still writable).
- Set the permissions on /var/www/hosts/jouweigenwebiste.nl/httpdocs/ebcms/oscommerce/admin/includes/configure.php to 644 (or 444 if this file is still writable).
- Review the directory permissions on the Administration Tool -> Tools -> Security Directory Permissions page.
- The Administration Tool should be further protected using htaccess/htpasswd and can be set-up within the Configuration -> Administrators page.
