

# Handleiding de help functie gebruiken binnen Plesk 12

Deze handleiding beschrijft de stappen die u dient te nemen om de help functie binnen Plesk 12 te gebruiken.

## Inhoud

De help pagina's opvragen .....	2
Video handleiding starten .....	3

## De help pagina's opvragen

- 1) Log in op uw Plesk omgeving met de daarvoor bestemde inloggegevens welke u bij de oplevering van het pakket ontvangen heeft. Klik dan vervolgens op 'Help' welke te vinden is in de donkere balk rechts bovenin en klik daarna op 'Read the Guide'

The screenshot shows the Plesk control panel interface. At the top, there is a navigation bar with the Denit logo and 'Quality does matter' tagline. The user is logged in as 'jouweigenwebsite.nl' with a subscription of the same name. A 'Help' dropdown menu is open, showing options for 'Read the Guide' and 'Watch Video Tutorials'. The main content area is divided into two sections: 'Statistics on Resource Usage' and 'Websites & Domains'.

**Statistics on Resource Usage**  
View detailed reports on disk space and traffic usage by services and by months.

Disk space	426 MB used of 1.95 GB (21%)
Traffic	298 MB/month used of Unlimited

[More →](#)

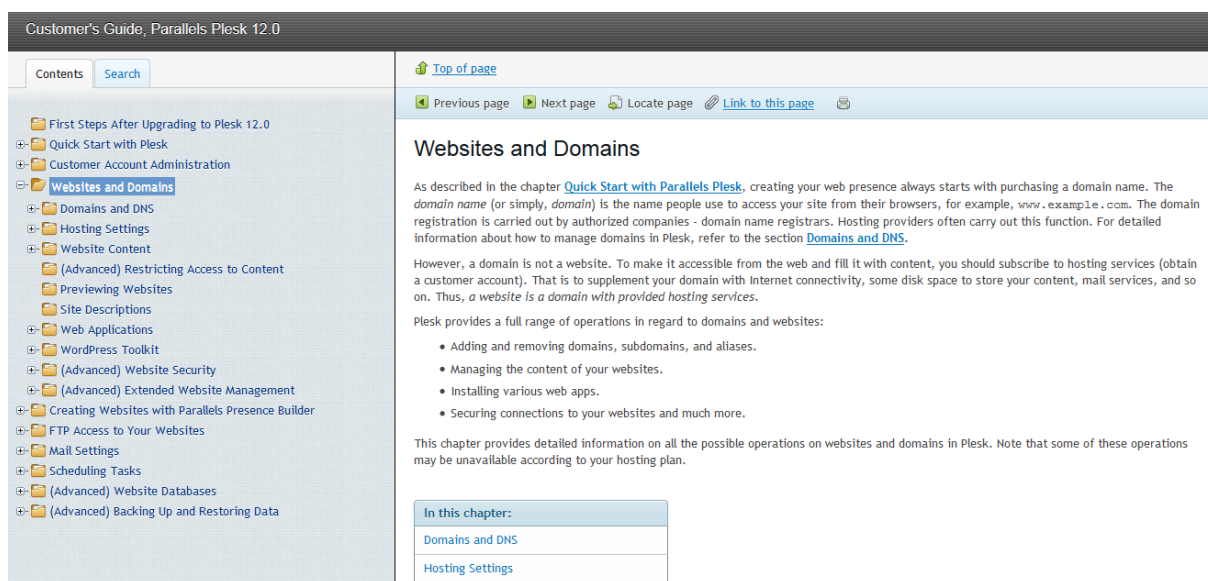

**Websites & Domains**  
Add domain names and set up websites. Manage website content and view statistics on how people visit your websites.

**jouweigenwebsite.nl**

- [File Manager](#)
- [Statistics](#)

[More →](#)

- 2) Er opent vervolgens een externe pagina van Parallels in een nieuw tabblad van uw browser. Hier kunt u eventueel zelf commentaar bij plaatsen

The screenshot shows the Parallels Plesk 12.0 Customer's Guide. The page title is 'Websites and Domains'. The left sidebar shows a table of contents with 'Websites and Domains' selected. The main content area contains text explaining domain registration and website creation, followed by a list of operations provided by Plesk.

**Websites and Domains**

As described in the chapter [Quick Start with Parallels Plesk](#), creating your web presence always starts with purchasing a domain name. The *domain name* (or simply, *domain*) is the name people use to access your site from their browsers, for example, [www.example.com](#). The domain registration is carried out by authorized companies - domain name registrars. Hosting providers often carry out this function. For detailed information about how to manage domains in Plesk, refer to the section [Domains and DNS](#).

However, a domain is not a website. To make it accessible from the web and fill it with content, you should subscribe to hosting services (obtain a customer account). That is to supplement your domain with Internet connectivity, some disk space to store your content, mail services, and so on. Thus, *a website is a domain with provided hosting services*.

Plesk provides a full range of operations in regard to domains and websites:

- Adding and removing domains, subdomains, and aliases.
- Managing the content of your websites.
- Installing various web apps.
- Securing connections to your websites and much more.

This chapter provides detailed information on all the possible operations on websites and domains in Plesk. Note that some of these operations may be unavailable according to your hosting plan.

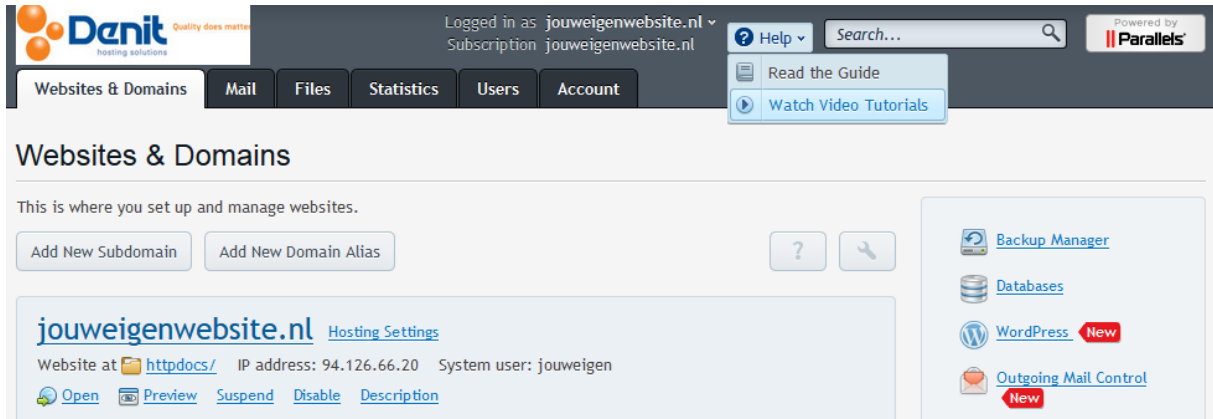

**In this chapter:**

<a href="#">Domains and DNS</a>
<a href="#">Hosting Settings</a>

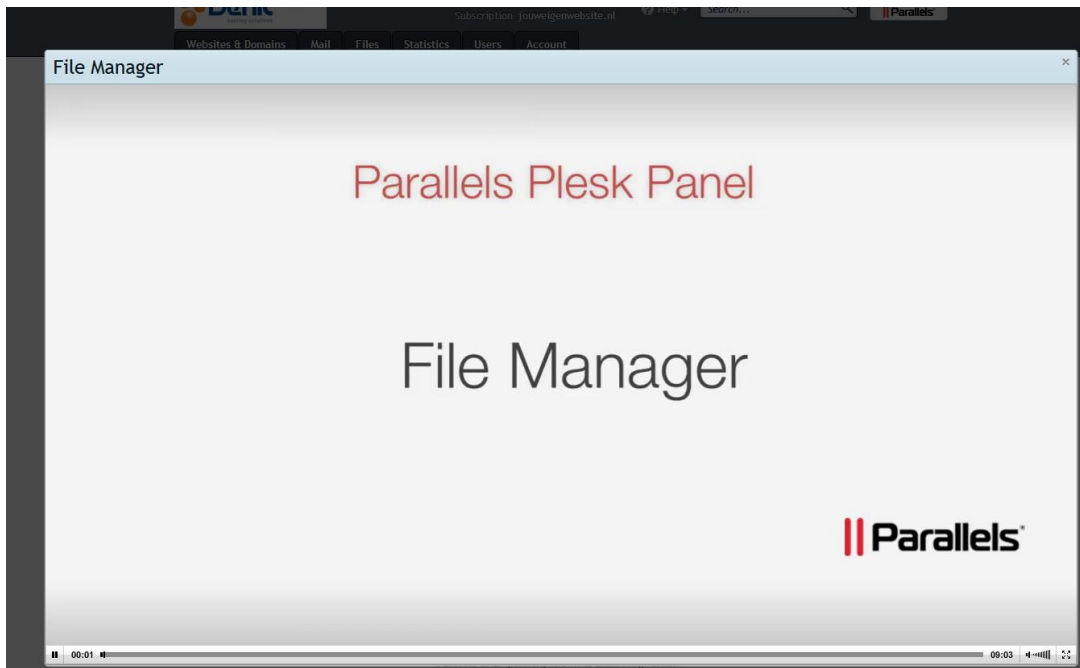

- 3) Wanneer u klaar bent met de door u gewenste uitleg gelezen te hebben kunt u het tabblad sluiten van uw browser
- 4) U komt vanzelf weer terug in het hoofdmenu van uw Plesk omgeving

## Video handleiding starten

- 1) Log in op uw Plesk omgeving met de daarvoor bestemde inloggegevens welke u bij de oplevering van het pakket ontvangen heeft. Klik vervolgens op 'Help' welke rechts boven in de donkere balk te vinden is en klik op 'Watch Video Tutorials'

- 2) Het is noodzakelijk voor het afspelen van de video's om Flash te installeren. Als voorbeeld starten we de uitleg video van de File Manager (Bestands Beheer)

- 3) Wanneer de video is afgelopen, klikt u rechts boven in op het grijs gekleurde kruisje. Vervolgens klikt u op het tabblad 'Websites & Domains' om weer terug te keren naar het hoofdmenu van uw Plesk omgeving
